

# CIVIL SERVICE HUB, KING STREET

Maple's Contour® louvres provide a rooftop plant screen for a new office building in Blackpool

## LOCATION

Blackpool

## PROJECT

Contour® SL screening louvres

## DATE

January 2025

## CONTRACTORS

Vinci Building UK

## ARCHITECTS

MAKE Architects

## DESIGN

- Contour® SL louvres span the office rooftop to over 200 linear metres
- Inverted louvres provide screening for the rooftop machinery
- Louvres were anodised in black to provide an appealing contrast with the red terracotta aesthetic of the building

## MANUFACTURE

- The anodisation process helps protect the blades against corrosive effects of the coastal environment
- System reaches 2.7m high to effectively screen and protect HVAC equipment

## INSTALLATION

- Modular system allowed efficient installation, which reduced time working at height
- Close collaboration with client meant materials were craned to roof to reduce manual handling

## VERDICT

“The new Civil Service Hub will provide a highly sustainable workspace for the benefit of local people and the wider community, while also creating welcoming public spaces for everyone to enjoy.”

Alan McBride, Technical Director, Muse

## DID YOU KNOW?

King Street Offices is the tallest office building in Blackpool and is our largest louvre project in the office and retail sector.
