

C44T Crank

Cassetted Blinds

MAPLE

Please note the line drawing above is an illustration and the product codes will vary according to headbox size.

C44T Crank

Features:

The C44T crank control cassette blind features a compact, robust 1:3½ gear mechanism operated by a detachable crank handle. The cassette is designed for top or face fixing and accommodates 45, 53 or 70mm grooved aluminium barrels, depending on blind size and fabric weight. Black or white hardware as standard.

Incorporating the tracker fabric retaining side channels for vandal-resistant blind alignment, with the functional tracker bottom bar and end caps that complete the system.

Benefits:

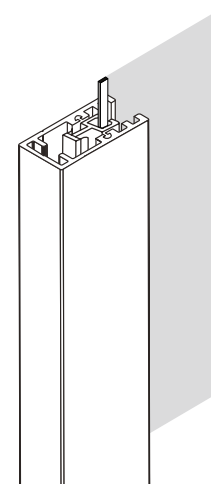

Developed to ensure a higher level of tamper-resistance, our tracker side channels ensure the fabric stays secure and prevents movement by air movement or persons around it. This is a popular solution for colleges, schools, libraries etc.

You can choose between a square or rounded headbox to complete the blind and protect it from dust and damage.

You can install our C44T cassette blind using our new goalpost installation technique, which simplifies the installation. Our new end plates allow the side channels to be attached to the headbox and installed as a frame, reducing the installation time.

Specification:

The C44T Crank. Slim aluminium profile with tracker side channels and bottom bar (in black or white) for tamper-resistance. Incorporating a detachable crank and flame retardant fabric.

Cassetted Blind Profile Dimension Guide

Model	Cassette Size (HxD)	Barrel Size Ø
